

Title: Meter Enclosure Cover
Phone: 902-483-9527

Inventor: John Gregory
Date: February 11, 2004

Specification

This invention is a meter enclosure cover which is used in conjunction with an electrical meter enclosure. The purpose of the meter enclosure cover is to protect the contents of the meter enclosure from tampering, rain, dirt, dust, etc, while allowing the meter to be fully visible at all times. The meter enclosure cover allows access to the meter, while preventing the meter from being removed from its socket.
